You should answer the questions after some serious thought but avoid spending too long on any given section. There are eight sections in total.

For each section distribute a total of exactly 10 points between the statements that you think most accurately describe your behaviour. There are no right or wrong answers. These points may be distributed between several sentences; in extreme cases they might be spread among all the sentences or 10 points may be given to a single sentence. However try and avoid either extreme.

Do not allocate more than three statements with a maximum 10, or your data cannot be analysed. Please allocate whole numbers only - no fractions or decimals. If you have no points to allocate to a statement, please leave the box blank.
